VINAYKUMAR TAKANKHAR

Cloud & DevOps Engineer

Pune, Maharashtra | +91 7841861261 | vinaykumartakankhar@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Aspiring Cloud & DevOps Engineer with hands-on experience developing cloud-based solutions, automation projects, and deployment workflows. Focused on understanding how cloud infrastructure is designed, provisioned, and managed, and how applications move from development to deployment. Driven to build scalable infrastructure, streamline software delivery, and engineer reliable systems through modern cloud and DevOps practices.

TECHNICAL SKILLS

Cloud Platforms: AWS, Microsoft Azure, Oracle Cloud Infrastructure (OCI)
CI/CD & Automation: Jenkins, GitHub Actions, Argo CD
Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Helm
Infrastructure as Code: Terraform, AWS CloudFormation
Monitoring & Observability: Prometheus, Grafana, Amazon CloudWatch, Amazon CloudTrail
Programming & Scripting: Python, Bash, YAML
Operating Systems & Version Control: Linux, Windows, Git, GitHub

PROFESSIONAL EXPERIENCE

AWS Cloud Intern | F13 Technologies *2025*

- Developed an event-driven image processing workflow using Amazon S3 and AWS Lambda.
- Built a serverless expense tracking application using API Gateway, Lambda, DynamoDB, and Cognito.
- Worked with IAM permissions and CloudWatch monitoring to support secure and observable cloud applications.
- Explored document processing automation using Amazon Textract and AWS Lambda.

TECHNICAL PROJECTS

Self-Healing CI/CD Deployment Pipeline GitHub
Jenkins, Docker, Nginx, Python, PowerShell, Pytest

- Built a Jenkins CI/CD pipeline automating Flask application testing, Docker image builds, and blue-green deployments.
- Implemented Nginx-based traffic switching with automated health checks and PowerShell rollback to the last known-good release.
- Maintained deployment state and JSONL audit logs; validated recovery workflows with 4 passing tests and Jenkins Builds #13–14.

Infrastructure-as-Code Kubernetes Platform GitHub
Terraform, Kubernetes, Helm, Docker, GitHub Actions

- Provisioned Kubernetes environments using Terraform and Helm with environment-specific configurations.
- Deployed containerised Flask workloads with health probes, resource limits, and Kubernetes service management.
- Automated CI/CD validation using GitHub Actions, covering unit tests, Docker builds, Helm checks, Terraform validation, and Kubernetes deployment testing.

Observability & Incident Diagnosis Platform GitHub
Prometheus, Grafana, Docker Compose, Python

- Built a containerised monitoring platform using Prometheus and Grafana to track application health, latency, and error rates.
- Developed alerting and a rule-based diagnosis engine to identify incidents and recommend remediation actions.
- Created Python REST APIs for health checks and evidence-based incident diagnosis.

MESH-TRACE – Smart Vehicle Crash Detection System GitHub
Final Year Project, 2025–2026

- Developed an IoT-based crash detection system integrating sensor fusion, GPS tracking, and severity classification to identify vehicle accidents and reduce false alerts.
- Contributed to AWS cloud infrastructure using IoT Core, Lambda, DynamoDB, and SNS for telemetry ingestion, crash-event processing, and alert management.
- Integrated cloud services with a React dashboard and enabled Wi-Fi/LoRa-based vehicle-to-vehicle alert delivery for low-connectivity environments.

EDUCATION

B.E. – Electronics & Telecommunication Engineering
P.E.S. Modern College of Engineering, Pune 2022–2026
CGPA: 7.19

CERTIFICATIONS

AWS Partner Certifications: Technical Accreditation, Cloud Economics, Digital Sovereignty, Generative AI Essentials
Oracle Cloud Infrastructure: OCI Foundations Associate, OCI AI Foundations Associate, OCI Generative AI Professional
DevOps & Site Reliability Engineering: Harness Certified Continuous Delivery & GitOps Developer, Linux Foundation LFS162 – Introduction to DevOps and SRE
